### [CASE5]

- 1.open padre
- 2.drag&drop the "test.pl" into Padre
- 3.open "テスト.pl" with "file->open" menu
- 3.close padre

The result just like CASE3

**[CASE6]**

drag&drop the "test.pl" onto Padre shortcut icon which on my PC desktop.

By the way, It seem that Japanese can't display in the "Syntax Check" window correctly also.
